ACOUSTIC CABINS **SILENTBOX®**

Silentbox® — a manufacturer of modern acoustic cabins for offices, co-working spaces, and public spaces.

Since 2019, we have been helping companies create comfortable conditions for communication, concentration, and productive work.

Effective soundproofing, thoughtful ergonomics, and modern design. The cabins integrate easily into your existing space without renovation or construction work.

The cabins provide privacy for calls, meetings, and focused work, improving user comfort and the efficiency of your space.

NOISE IMPACTS ON PRODUCTIVITY

63%

of employees suffer from distractions and noise in the office

SOURCE: SCIENCEDIRECT

20%

of the workday is spent searching for a quiet place

SOURCE: BBC CAPITAL

50 dB

comfortable level for concentration

Normal conversation = 60–65 dB

SOURCE: UNIVERSITY OF CALIFORNIA

FAMILIAR SITUATIONS

Employees are distracted by colleagues' calls

No space for confidential conversations

Meeting rooms are always busy

Video calls disturb colleagues

Brainstorming is impossible in open-plan offices.

TECHNOLOGY

PATENTED DESIGN

CERTIFIED ACOUSTIC INSULATION

to Standards ISO 23351-1 • ISO 11957

CERTIFIED

AGH Kraków · 2024

SOUNDPROOFING

35

 dB

The cabin provides up to 35 dB of noise isolation, effectively blocking sound waves across various frequencies and volumes.

SMART ELECTRONICS

Silentbox® senses presence and automatically activates ventilation and lighting – with a 6–8 minute interval.

SOUND ATTENUATORS

Air flows through special attenuators, preventing noise from passing through the ventilation system, either inwards or outwards.

TRIPLE-GLAZED LAMINATED GLASS

Secure Triplex Glass: all layers are of varying thickness to prevent resonance across different frequencies.

ECHO-FREE ENVIRONMENT

Internal sound-absorbing materials eliminate echo, creating a comfortable acoustic environment.

USB & POWER OUTLET

Inside, each cabin is equipped with a 220 V power socket, a USB port, and a USB Type-C (2.1 A) port – to power all your work devices.

LED LIGHTING

An LED light fixture with a colour temperature of 3500–4500 K and a luminous flux of 450 lx.

VENTILATION

250–600

 m³/h

A quiet fan continuously refreshes the air. Optimised channels prevent the stagnation of air and carbon dioxide (CO₂).
